

MOON WALKER è un attrezzo multifunzione che riproduce il movimento ispirato al Nordic Walking, ma in condizioni di parziale gravità dovuta all'immersione:

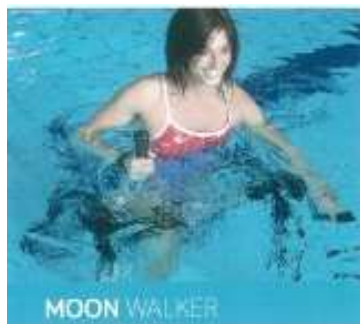

- Permette di allenare contemporaneamente gambe e braccia
- Efficace anche nell'impiego dei soli arti superiori, che possono accompagnare il movimento delle gambe o essere attivi nello sforzo
- Attrezzo costruito con materiale idoneo a rimanere in acqua per lungo periodo

MOON WALKER is a multifunctional equipment that reproduces a form of walking or running in low-gravity, a movement inspired by Nordic Walking:

- Allows simultaneous training of legs and arms
- Also effective in the use of only the upper limbs, which may accompany the movement of the legs or be active in the effort
- Resistant material, suitable for prolonged periods of time in the water
