

## Viron Salt Chlorinator

เครื่องผลิตคลอรีนจากเกลือรุ่น Viron สามารถใช้กับสระแมกนีเซียมได้

AstralPool's Viron Salt Chlorinator brings a new benchmark in efficiency, control, convenience and reliability. The Viron Salt Chlorinator's advanced electronic power supply provides pure DC power to maximize the efficiency of the electrodes to produce the highest level of chlorine for the lowest power consumption, reducing your energy costs and keeping your pool safe and healthy. Manual dosing with liquid or granular chlorine can be haphazard. Over-dosing can cause eye irritation, itchy skin and strong chlorine odour. The Viron Salt Chlorinator continually generated chlorine at the level you require allowing you to set and forget. With easy to use touch pad, intelligent self cleaning of the cell, pool or spa dosing control and also a filter backwash timer you can't by the Viron Salt Chlorinator to make your pool healthy and enjoyable.

- Energy efficient switch mode power supply
- Robust reliable construction
- Intelligent self cleaning
- Touch pad and time clock control

CODE	ITEM	SPECIFICATION			Pool Volume m <sup>3</sup>
		CHLORINE OUTPUT gm/h	POWER

# VIRON SALT CHLORINATOR

## Viron Salt Chlorinator

- ✓ Energy efficient switch mode power supply
- ✓ Robust reliable construction
- ✓ Intelligent self cleaning for long life
- ✓ Touch pad and time clock control

## Viron Salt Chlorinator

It is said that all life evolved from the sea and that salt water makes up 70% of our bodies, so it's little wonder we find salt pools the most natural medium to swim in.

It's one reason why salt chlorinators are now the accepted standard for pool sanitising.

AstralPool's new Viron Salt Chlorinator brings a new benchmark in efficiency, control, convenience and reliability. To be accurate, salt or minerals don't sanitise the pool, chlorine does. Salt or minerals, when dissolved into your pool water are converted by the Viron Salt Chlorinator into chlorine which sanitises your pool. The salts or minerals, in roughly the same solution as a tear drop, pass through the electrolytic plates in the Viron chlorinator cell to form chlorine which kills all the contaminants within the pool and prevents bacteria and algae from forming. What a nice solution – particularly when some of these minerals and salts can be so good for the health of your family just by being in your pool water. The result is pure, crystal clear, soft feeling water and happy, healthy swimmers.

### EFFICIENCY

The Viron Salt Chlorinator's advanced electronic power supply provides pure DC power to maximize the efficiency of the electrodes to produce the highest level of chlorine for the lowest power consumption, reducing your energy costs and keeping your pool safe and healthy.

### CONTROL

Manual dosing with liquid or granular chlorine can be haphazard. Over-dosing can cause eye irritation, itchy skin and a strong chlorine odour. The Viron Salt Chlorinator continually generates chlorine at the level you require. Set and forget.

### CONVENIENCE

The easy to use touch pad enables complete control of your pump and sanitiser system. While easy to use, it's packed full of features making your swimming pool a pleasure to own and use. Chlorine output, Pool or Spa selection, filter cleaning,

time of operation, and additional run times are all selected and information is provided on the large liquid crystal display. The inbuilt time clock can be simply disabled if using an external timer to control filtration and chlorinating hours.

### INTELLIGENT SELF CLEANING

During operation, the anode in the electrolytic cell attracts a build up of calcium and other debris which requires periodic cleaning. Most chlorinators reverse the polarity to the cell, which in turn releases the residue of calcium and debris on the anode. The intelligent Viron chlorinator analyses the output setting to optimise the polarity of the electrolytic cell. By minimising the number of reversals ensures the cell is clean and significantly extends the life of your chlorinator.

### POOL OR SPA SELECTION

When isolating your spa from the swimming pool, demand for sanitiser is greatly reduced. It's simple really, while spa water is warm and requires sanitiser to kill and prevent the growth of bacteria and algae, its comparatively small volume means it only needs a fraction of the sanitiser that your pool requires. One touch of the "Spa" button on the Viron chlorinator and your sanitiser output is automatically reduced to suit the demands of your spa. Why is this important? Excessive sanitiser is unpleasant, causing itching skin, bleached swimwear and damaging heaters, pumps and interior finishes in your spa or pool. Just another way the Viron Chlorinator looks after your family.
