

Certikin Glass Filter Media

is the environmentally friendly filter media and a viable alternative to sand; made from glass recycled in the UK, it doesn't involve intrusive mining and the use of scarce resources.

- It is more efficient. It can remove up to 30% more material and pollutants than sand, so saving on backwashing and the resultant water, energy and chemical treatment costs
- It requires less material. It's less dense than sand, requiring 15% less media to fill the equivalent filter
- It doesn't degrade. It therefore has a longer life span
- It is suitable for both commercial and residential filters with laterals or nozzle plates.
- It is available in three grades of media Grade 1, Grade 2
All grades are milled down to remove sharp points and are packed in 25kg bags.
- Grade 1 is equivalent to 16/30 grade sand (0.54-0.80 mm.)
- Grade 2 is equivalent to 8/16 grade sand (1.04-1.34 mm.)

Certikin Glass Media - Grade 1 - 25kg Bag

CH-GM-001 Grade 1 Glass Media - 25kg Bag (0.54-0.80 mm.)

Certikin Glass Media - Grade 2 - 25kg Bag

CH-GM-002 Grade 2 Glass Media - 25kg Bag (1.04-1.34 mm.)
