New from Harvia – Helix and Helix Pro steam generators

Harvia Helix is a compact, yet efficient steam generator intended for private and spa use. Harvia Helix Pro is a steam generator designed for high output demanding spa use. Both share the same basic construction, in which reliability, trouble-free operation and the relaxing steam bath experience have been the main design principles.

Reliability through innovations
- Water level is measured in clean water, in a separate measuring cup to prevent problems caused by water impurities.
- A sediment cup collects water impurities that fall on the bottom of the water container.

Easy to use, easy maintenance
- Stylish touch-screen control panel.
- Basic maintenance – sediment cup emptying and checking the water level sensor – can be done without opening the cover of the unit.

Compact design
- Harvia Helix can be installed in a low space, i.e. on top of a steam cabin. The steam and water connections are on the side of the unit.

Multidrive option
- Up to three HGX11L extra power units can be linked with a basic steam generator to be controlled with the same control panel.
Stylish touch-screen control panel
The steam generator is controlled by a separate touch-screen control panel.
Controlled functions:
- steam generator (temperature, on-time, delayed start)
- fragrance pump
- lighting
- fan

Manual

Automatic

1. Control panel
2. Temperature sensor
3. Steam pipe
4. Steam nozzle
5. Water supply pipe
6. Water supply pipe valve
7. Discharge water pipe
8. Discharge valve
9. Floor drain
10. Overpressure valve
11. Connection cable
12. Fragrance pump (optional)
